

Key Performance Indicators

These are the three KPIs chosen by our team to gauge our performance on the development of our product:

1. *Individual stress*: Individual level of stress felt at the beginning and the end of the sprint. Stress is measured on a scale from 1 to 5. The evaluation as a team is done by taking the average stress level.
2. *Individual satisfaction*: Level of satisfaction on the overall individual contribution to the sprint. Satisfaction is measured on a scale from 1 to 5. The evaluation as a team is done by taking the average satisfaction level.
3. *Sprint completion*: Number of story points completed out of the total number of points planned for the sprint. The completion is measured in percentages for the sprint as a whole (for the entire team). In our team a small task is valued at 1 point, a medium task at 3 points, a large task at 5 points and an extra large task at 8 points.
