Johan Fridlund

Individual reflection

- what do I want to learn or understand better?

I want to learn more about APIs since I have not used any before. I also want to learn how to use SCRUM and agile programming to improve at working in a group and to do it with more confidence.

- how can I help someone else, or the entire team, to learn something new?

By being available as much as possible in the discord channel and facebook chat i hope to be able to work together with team members who have questions or are stuck in their process.

- what is my contribution towards the team's use of Scrum?

I have been active in the discord channel discussing how we should set up our SCRUM board to show the progression of the project more clearly.

- what is my contribution towards the team's deliveries?

I have contributed towards the team's deliveries by coming with suggestions towards the project backlog and by giving my opinion along the creation process of both the KPIs we use and the social contract.
